

Cybersecurity Awareness

Preventing Data Breaches

Everyone in the workplace has a role to play in information security. The first step in reducing the risk of data breaches is to learn what they are and be aware of how they typically occur, so that appropriate measures can be taken to prevent them from taking place in the future.

This course surveys the most common information security risks and breaches, including direct observation, malware viruses, phishing, identity theft, spam and credit card skimming. It explores how mobile devices such as laptops and phones are vulnerable to theft. It also considers the security risks associated with working remotely, as well as the personal and professional issues associated with online activities such as using social media or storing information in the cloud. Each topic is explored in plain English, followed by a clear explanation of simple strategies for protecting data.

Course Overview

The Cybersecurity Awareness course has been specially designed by subject matter experts. This course explains how all employees have an essential role to play in keeping businesses safe.

Target Audience

This cybersecurity awareness training course is suitable for everyone responsible for handling information in the workplace, whether they are at work, at home or offsite.

Knowledge Test & Certification

The course has several Knowledge Checks to test if the participants have understood the content of the training. After scoring the minimum passing rate, participants can print out their Certification of Completion.

Course Objectives

- define cybersecurity
- describe key external cybersecurity attacks
- identify different types of malware
- identify common online social engineering scams
- outline what to do when a cybersecurity incident occurs

Course Content

Module 1: Introduction

- What is cybersecurity
- Types of Malware
- Online social engineering scams
- Cybersecurity incidents

Module 2: Protecting Work Information

- Access control
- Software restrictions and updates
- Internet use
- Credit card payments

Module 3: At Home and Offsite

- Mobile devices
- Securing your Wi-Fi connection
- Remote storage
- Social media
- Backing up data

i-KYC LMS platform & Administration Services

All fees include the roll-out of the e-learning to all participants using the state-of-the-art i-KYC Learning Management Platform.

Furthermore, fees include our Administration Services for a rapid and no-hassle deployment of your compliance training obligation. These Administration services include:

- ▶ creation of unique user accounts for all participants;
- ▶ roll out of e-learning courses to the target group (inviting learners by email);
- ▶ data collection and progress monitoring;
- ▶ due date follow-up;
- ▶ periodic management reporting;
- ▶ delivery of Audit Report after project closure.
